Volume 48, Number 2

February 2006

## Greetings and Happy New Year to all Club Members!

I would like to thank Dave, John, Ray and Dan for their efforts to make 2005 a very successful year. With some effort from all club members, we can make 2006 even more successful.

Some of the goals I have for this year are to: increase our active membership by at least ten new members; regain the interest of some of the members we have not seen for a while; offer more opportunities to our members to do something we all love to do, DIVE. That is what we are all about.

This month we have named Dave Smith as our "Diver of the Month". He has been an inspiration to all of us over the past year. Prior to his election to President, he was always there willing to help whenever needed. Dave, from all the members, a big "THANK YOU".

We have elected Bob Boyle as the "Member of the Month" for January. Ever since I have been a member of the club, Bob has showered the club with his generosity from Undersea Divers. At every function he is there with a generous supply of raffle prizes, donations and his quick sense of humor. He has always been there to support the club. We all owe him a big "THANK YOU". When you're in the area of 42 Water Street stop by and show our support for him. Bob thanks again.

*Air Bubbles* needs our ongoing support. A few years back members would publish their favorite "summer-time" recipes. It didn't make the winter go by faster, but they were fun to try. If you have any favorite recipes, send them off to Mary. To the Dive Masters and Instructors in the club, why not share some safety tips and equipment checks with other club members. Maybe some funny stories of dives you made with students that keep you teaching the newest in a sport we all love.

Lastly, I would like to thank Daryl Findlay, Mary Howard and John Ferrier for heading up activities,

membership committee and *Air Bubbles*. The club would not work without these members.

Dave Metrano  
NSF President, 2006

## A note from Capt. Dave (Metrano) 1/18/06

Last night I took a leisurely drive to Quincy to visit our friends at the South Shore Neptunes Dive Club. I was very well received by the membership. The 'Neptunes' are very interested in doing some combined club activities during the year. We will touch bases with them at the Sea Rover's Show in March. If you have any ideas or some activity you might be interested in, please let me or Daryl know. As I crossed Quincy Bay Bridge, I was thinking maybe an underwater hockey tournament or volley ball game? Who knows, this could become a "rivalry" in the making.

The main event at the meeting was the showing of the Aaron Faulls film "*Still On Her Keel*". This is a completed film of the Chester A. Polling. The film was very well done and very interesting.

**Tom Huff will be showing this film at our meeting on February 9th.** I urge everyone who can to attend this meeting. You will be very pleased that you did. Bring a guest and enjoy the evening. Let's give Tom a big welcome and have a great attendance.

## **Bonaire Anyone??**

We are putting out feelers to see how many people might be interested in a NSF club trip to Bonaire. The suggestion so far is for some time in September.

Contact Dave Metrano if you are interested.

## Hello Scuba and Marine Enthusiasts!

Here's a quick reminder to get your tickets now for our 52nd Annual Boston Sea Rovers International Underwater Clinic, March 4-5, 2006, at the Fairmont Copley Plaza Hotel in Boston, MA.

Our theme this year is Exploration and Discovery, and the weekend has something for everyone, and full details are available on our website, <http://www.BostonSeaRovers.com>.

Two new features have been added to the clinic this year. Saturday will feature a technical diving forum, and Sunday includes an interactive kid's exploration room.

A limited number of discount hotel rooms are available until February 4th at the Fairmont Copley Hotel, accessed through our website, or by calling 800-441-1414, and using Promo Code GRBSR1. Please make your reservations early to ensure availability.

You can purchase tickets through the web site by credit card, or by mail using the form in the flyer that is coming out soon (some discounts are available).

We look forward to your continued support and hope you will be able to join us on March 4th and 5th.

# From the Library of the

Hi Froggies!

What does a retired president usually do when they leave the **GREEN HOUSE**? Why, they build their LIBRARY, of course! So, since I have the ENTIRE North Shore Frogmen's library at my disposal, I will be, over the coming months, cataloging what is in it and make this information available to all the members of Froggie nation!

This month, I want to make you aware of a series of GREAT oceanographic periodicals! These collections were printed from 1990 to 1993. The topics range from:

<u>ISSUE SUBJECT</u>	<u>VOLUME</u>	<u>NO:</u>	<u>NSF#</u>
Naval Oceanography	Vol 33	No 4	P1
Ocean Engineering & Technology	Vol 34	No 1	P2
Reproductive Adaptation in Marine Organisms	Vol 34	No 3	P3
Mid-Ocean Ridges	Vol 34	No 4	P4
Marine Chemistry	Vol 35	No 1	P5
Physical Oceanography	Vol 35	No 2	P6
Biological Oceanography	Vol 35	No 3	P7
Marine Geology & Geophysics	Vol 35	No 4	P8
Coastal Science & Policy I	Vol 36	No 1	P9

Each issue has includes several topics relating to the title. For example, the *Marine Geology & Geophysics* issue has topics relating to deep sea trenches, underwater volcanoes, deep-ocean drilling, and history of the great ocean conveyor. A plethora of information for the person really interested in our oceans!

NSF Number: P8  
Issued: Winter 1992/93  
Pages: 104

This is just a small sample of what is available to us in the Northshore Frogmen's Library. As time permits, I will be going through the library and showcasing various books of interest. I will post an updated library listing on [www.geocities.com/nsfrogmen/nsflibrary.html](http://www.geocities.com/nsfrogmen/nsflibrary.html). I hope to get together a listing of all the books, videos, periodicals, and other goodies contained in OUR library.

To borrow something from the library, please contact me at: [DiverDave8@hotmail.com](mailto:DiverDave8@hotmail.com)

Please put in the subject: **NSF Library** and then tell me what you want. Be sure to include the all important NSF number! I will then bring it to the next meeting at the Franco. You will be able to have it as long as you want, as long as there isn't anyone waiting for it. The only requirements for borrowing from the library are that you are a paid member of the club for the current year, and you return your selection in the same condition in which you got it! That's all there is to it!

So if you're not diving into the ocean, **DIVE INTO A BOOK!!!**

Your librarian,  
DiverDave Smith

### Bay State Council of Divers

The next Bay State Council of Divers meeting will be on Wednesday, February 8th at 7:30 at the South Shore Neptunes' Clubhouse in Quincy (corner of Joyce and Quarry Streets). Evening refreshments will be provided (including box of Joe!)

We are especially interested in having the dive shop operators in attendance. Please contact your local dive shop and drag them along.

### **NEU Marine Science Center Evening Lecture Series**

The Northeastern University Marine Science Center holds a series of lectures on Tuesdays at their location in Nahant, 7-8:30PM. The lecture given by Connie Merigo on January 24<sup>th</sup> about "**New England Aquarium Rescue and Rehab**" was very interesting and greatly enjoyed by the NSF members who attended. One useful bit of information that we learned was that now that "everyone" has digital cameras and email capacity, emailed photographs of "stranded" seals, dolphins and whales can be very helpful to rescue personnel in determining the status of the animals prior to arrival at the site.

Following is a list of the lectures coming up in the next several months.

**February 7<sup>th</sup> – "Sustainable Aquaculture of Softshell Clams on Massachusetts' North Shore"** by Dr. Joe Buttner, Associate Professor at Salem State College and Aquaculture Program Coordinator NMAC, and Jack Grundstrom, Shellfish Culturist.

Aquaculture is used to harvest much of the seafood and shellfish that we consume today. Dr. Buttner will present the mechanics behind aquaculture, specifically for soft-shell clams. Jack Grundstrom, a lifelong resident of the North Shore will let us in on the ins and outs of his business.

**March 14<sup>th</sup> – "Ten Hours From Dawn: A True Story of Heroism and Tragedy aboard the Can Do"** by Michael Tougias.

During the height of the Blizzard of 1978 the pilot boat **Can Do**, with five men aboard, set out from Gloucester to assist a lost Coast Guard boat and an oil tanker that was in Mayday situation. **Ten Hours Until Dawn** tells the story of what happened on that awful night when the seas were producing monstrous waves of 40 ft and the wind was screaming at 100 mph."

Michael Tougias is the author of 15 books including his latest book, **Ten Hours Until Dawn**. Using slides of the boats, the men involved, and photos of the storm, Tougias will take the viewer through this incredible night where many lives hung in the balance.

**April 25<sup>th</sup> – "Salt Marsh Ecology"** by Dr. Pat Ewanchuk of Providence College.

More details coming soon for this lecture!

## Recipe Corner

Mary,

Since I asked the members to submit their favorite "Summer" recipes I'll start off

### "Chapter Two Swizzle"

Combine the following in a large pitcher:

4 1/2 oz of Black Gosslin's Rum

4 1/2 oz of Gold Gosslin's Rum

4 1/2 oz of Light Gosslin's Rum

3 3/4 oz of Grenadine

28 1/2 oz Unsweetened Pineapple juice

15 oz Hood O.J.

6 shakes of bitters

Add some crushed ice and stir or "swizzle" vigorously. Enjoy!

I've been making the "swizzle" since I went to Bermuda in 1972. It is even better the next day!
